About me:
I am a self taught full stack web developer looking to transition from being a full time paramedic to working full time as a software developer.

Work Experience:

Lifeline / Fallon EMS:
- **Title**: Paramedic | **Location:** Woburn, MA | **Dates:** April 2018 – Present
- **Responsibilities:**
  - Provide appropriate medical care in accordance with Massachusetts OEMS protocols to all patients, appropriately document all care provided, and check all equipment prior to shift.

US Army Reservers:
- **Title**: Combat medic | **Location:** Taunton, MA | **Dates:** December 2012 – Present
- **Responsibilities:**
  - Be accountable for myself and my fellow soliders. Perform all tasks in a military manner. Provide appropriate care to fellow injured and ill soldiers in all environments.

Stat / Southcoast EMS:
- **Title**: Paramedic | **Location:** Dartmouth, MA | **Dates:** February 2015 – April 2018
- **Responsibilities:**
  - Provide appropriate medical care in accordance with Rhode Island and Massachusetts OEMS protocols to all patients, appropriately document all care provided, and check all equipment prior to shift.

Skills:
- Ruby, Ruby on Rails, Javascript, Java, Bash scripting, SQL, HTML / CSS, and PHP
- Amazon Web Services, Linux / Unix based distros, DigitalOcean / Linode servers, Git

Projects:

KubsCLI: Source Code
- **Description**: A CLI app created in Ruby in order to maintain a consistent development environment across multiple Ubuntu based distros.
- **Tools used**: Ruby, Minitest, Bundler, Git, Thor, YAML
